Mass & Balance + current fuel plan

D-MULTI — Test Test POH wiring only [UNVERIFIED] · Normal

Generated: 2026-11-14T05:37:15.294Z (UTC)

Profile and source status

draft; draft [UNVERIFIED]

Profile verification is a recorded user check, not operational approval. Acknowledging a draft selection does not verify its data.

Calculation based on unverified external data. Pilot in Command assumes full responsibility.

Check all calculations against the aircraft's official POH/AFM before flight. The official handbook takes precedence.

Verification provenance: not recorded.

Profile source units: kg. Datum: Test datum [UNVERIFIED].

- Weighing date 2026-01-01, valid from 2026-01-01: BEM 500.0 kg [UNVERIFIED], empty CG 1.000 m [UNVERIFIED] (normalized SI).

Current loading

Station	Quantity
Synthetic tank	50 kg [UNVERIFIED]
Synthetic empty seat 1: Long warning pagination text Long warning pagination text Long warning pagination text Long warning pagination text Long warning pagination text	0 kg [UNVERIFIED]
Synthetic empty seat 2: Long warning pagination text Long warning pagination text Long warning pagination text Long warning pagination text Long warning pagination text	0 kg [UNVERIFIED]
Synthetic empty seat 3: Long warning pagination text Long warning pagination text Long warning pagination text Long warning pagination text Long warning pagination text	0 kg [UNVERIFIED]
Synthetic empty seat 4: Long warning pagination text Long warning pagination text Long warning pagination text Long warning pagination text Long warning pagination text	0 kg [UNVERIFIED]
Synthetic empty seat 5: Long warning pagination text Long warning pagination text Long warning pagination text Long warning pagination text Long warning pagination text	0 kg [UNVERIFIED]

Station	Quantity
Synthetic empty seat 6: Long warning pagination text Long warning pagination text Long warning pagination text Long warning pagination text Long warning pagination text	0 kg [UNVERIFIED]
Synthetic empty seat 7: Long warning pagination text Long warning pagination text Long warning pagination text Long warning pagination text Long warning pagination text	0 kg [UNVERIFIED]
Synthetic empty seat 8: Long warning pagination text Long warning pagination text Long warning pagination text Long warning pagination text Long warning pagination text	0 kg [UNVERIFIED]
Synthetic empty seat 9: Long warning pagination text Long warning pagination text Long warning pagination text Long warning pagination text Long warning pagination text	0 kg [UNVERIFIED]
Synthetic empty seat 10: Long warning pagination text Long warning pagination text Long warning pagination text Long warning pagination text Long warning pagination text	0 kg [UNVERIFIED]
Synthetic empty seat 11: Long warning pagination text Long warning pagination text Long warning pagination text Long warning pagination text Long warning pagination text	0 kg [UNVERIFIED]
Synthetic empty seat 12: Long warning pagination text Long warning pagination text Long warning pagination text Long warning pagination text Long warning pagination text	0 kg [UNVERIFIED]
Synthetic second tank	50 kg [UNVERIFIED]

M&B results

Endpoint	Mass	CG arm
Takeoff	580.0 kg [UNVERIFIED]	1.000 m [UNVERIFIED]
Zero fuel	500.0 kg [UNVERIFIED]	1.000 m [UNVERIFIED]
All usable fuel burned	500.0 kg [UNVERIFIED]	1.000 m [UNVERIFIED]

The all-usable-fuel-burned endpoint is not the trip-specific arrival. This summary does not assess full-flight or landing suitability and provides no Go/No-Go advisory.

Current M&B notifications

- **WARNING · WARN-AC-002 · Aircraft.Status**: Draft Profile Active
- **WARNING · WARN-UQ-001 · MassBalance.Plausibility**: Implausible mass on required stations: Synthetic empty seat 1: Long warning pagination text Long warning pagination text Long warning pagination text Long warning pagination text Long warning pagination text , Synthetic empty seat 2: Long warning pagination text Long warning pagination text Long warning pagination text Long warning pagination text Long warning pagination text , Synthetic empty seat 3: Long warning pagination text Long warning pagination text Long warning pagination text Long warning pagination text Long warning pagination text , Synthetic empty seat 4: Long warning pagination text Long warning pagination text Long warning pagination text Long warning pagination text Long warning pagination text , Synthetic empty seat 5: Long warning pagination text Long warning pagination text Long warning pagination text Long warning pagination text Long warning pagination text , Synthetic empty seat 6: Long warning pagination text Long warning pagination text Long warning pagination text Long warning pagination text Long warning pagination text , Synthetic empty seat 7: Long warning pagination text Long warning pagination text Long warning pagination text Long warning pagination text Long warning pagination text , Synthetic empty seat 8: Long warning pagination text Long warning pagination text Long warning pagination text Long warning pagination text Long warning pagination text , Synthetic empty seat 9: Long warning pagination text Long warning pagination text Long warning pagination text Long warning pagination text Long warning pagination text , Synthetic empty seat 10: Long warning pagination text Long warning pagination text Long warning pagination text Long warning pagination text Long warning pagination text , Synthetic empty seat 11: Long warning pagination text Long warning pagination text Long warning pagination text Long warning pagination text Long warning pagination text , Synthetic empty seat 12: Long warning pagination text Long warning pagination text Long warning pagination text Long warning pagination text Long warning pagination text — verify input

Applicable category limits

Maximum takeoff mass: 1200.0 kg [UNVERIFIED]. Maximum zero-fuel mass: Not specified.

Envelope vertices (arm graph, closed polygon; tabular presentation only):

Mass	Envelope coordinate
500.0 kg [UNVERIFIED]	0.500 m [UNVERIFIED]
1200.0 kg [UNVERIFIED]	0.500 m [UNVERIFIED]
1200.0 kg [UNVERIFIED]	1.500 m [UNVERIFIED]
500.0 kg [UNVERIFIED]	1.500 m [UNVERIFIED]

Current fuel plan and estimated trip arrival

Manual method: Direct Trip Fuel (kg).

Parameter	Value
Usable fuel	80 kg [UNVERIFIED]
Excluded unusable fuel	20 kg [UNVERIFIED]
Takeoff mass	580 kg [UNVERIFIED]
Trip fuel burned	20 kg [UNVERIFIED]

Parameter	Value
Estimated arrival mass	560 kg [UNVERIFIED]
Usable fuel remaining on arrival	60 kg [UNVERIFIED]

Selected arrival CG burn sequence: Incomplete synthetic sequence

Estimated arrival CG unavailable: Current M&B moment and fuel inventory must be finite and consistent with the trip burn; the named sequence must cover every available tank exactly once with distinct positive integer positions.

Direct Trip Fuel is the explicit mass expected to burn during the trip. No duration, consumption, endurance or reserve budget is calculated.

Arithmetic planning aid only. Verify against your aircraft POH/AFM. Reserve remains aboard; usable fuel remaining on arrival is before reserve budgeting and differs from the margin after trip + reserve. Trip arrival is separate from the all-usable-fuel-burned M&B endpoint. This does not assess operational suitability, landing suitability or the full burn path/envelope and provides no Go/No-Go advisory.

No Performance, runway or weather results are included.
